

What is claimed is:

1. A mouse pad structure comprising :
a body proper in a shape of a hard panel; and a hollow hole to go through the panel.
- 5 2. The mouse pad structure as recited in claim 1, wherein one side of the hollow hole has a hole of smaller diameter which is connected via a groove to the hollow hole.
3. The mouse pad structure as recited in claim 1, wherein the width of the groove is narrower than that of the smaller hole.
- 10 4. The mouse pad structure as recited in claim 1, wherein the position of the hole of smaller diameter is not limited to a certain location on the panel.
5. The mouse pad structure as recited in claim 1, wherein the bottom of the panel has a plurality of protrusions.
- 15 6. The mouse pad structure as recited in claim 1, wherein the bottom of the panel has an anti-slippery pad which also has a plurality of protrusions.
